

To make this vase you will need 3/8" slabs, the equivalent of 3 sheets of printer paper (8.5x11") Allow the slabs to set up for a few hours (firm but flexible)

The finished vase will be between 9 and 10 inches tall.

You need minimal tools:
smooth rib or butter tub handmade rib
scoring needle or fork
fettling knife or butter knife
slip (make your own by drying a bit of your clay body out and rehydrating it.)

x 8

*I made this piece symmetrical in photoshop for better results. It's also smaller for easy printing.
